

To whomever it may concern,

I would like to recommend Mr. Aleksandar Stanisavljevic for an engineering position within your company.

Mr. Stanisavljevic worked at Invenio Serbia from year 2013 to February 2016 at the position of Sorting group Team leader, serving customers in Serbia like Fiat, Johnson Controls, Robert Bosch, etc. as well as clients from the region of South-Eastern Europe like Faurecia (Romania), Magna Powertrains (Bulgaria), Toyota boshoku (Poland), etc.

Mr. Stanisavljevic proved himself as reliable worker. Please note that for Invenio, the only reason for parting ways with Mr. Stanisavljevic is unfortunate low production regime of Fiat Serbia that forced us to drastically reduce the number of our employees.

During his time with Invenio Mr. Stanisavljevic gained a high awareness of automotive industry production culture that immediately recommends him for position of production or quality control team leader position.

Furthermore, with little investment in his training, he can quickly reach level of knowledge for the position of junior engineer in any area of automotive industry.

With all this in mind, I believe that you will find within Mr. Stanisavljevic valuable addition to your company.

Best regards,

Invenio d.o.o.
